

I support satellite radio and oppose HR 4026.  
It would be and is a benefit to Satellite Radio to broadcast local / regional programming as well as its traffic and weather channels. Satellite radio provides variety and quality that are not available elsewhere. If I am paying for these services it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. If I want to have local programming as I travel then please let me. HR 4026 is just another way that big business is trying to keep down competition.

I respectfully urge the FCC to reject the NAB's petition 04-160 and to support satellite radios ability to provide the kind of programming that I the consumer demand and deserve.
